GRACE RENEWS DONATION TO HOSPITAL IN LIBBY, MONTANA

Columbia, Maryland – June 7, 2011 – W. R. Grace & Co. (NYSE: GRA) has donated \$250,000 to St. John’s Lutheran Hospital in Libby, Montana for the twelfth consecutive year in order to help St. John’s provide high quality health care to residents of the town and nearby communities in South Lincoln County.

Part of the donation will go towards assuring that the hospital has the necessary infrastructure to conduct independent health screenings to Libby residents. Grace donations have thus far totaled more than \$2.5 million and been used to establish a clinic, train medical staff, purchase equipment (such as a Magnetic Resonance Imaging or MRI unit and new devices for a state-of-the-art laboratory), treat patients and subsidize medical procedures.

“The donations from Grace continue to help us improve our facility and provide the best possible care for our patients. We appreciate the steps Grace has taken to help our community,” said Bill Patten, Chief Executive Officer at St. John’s Lutheran Hospital.

In addition, Grace created a medical expense program for current and former residents of Libby who have asbestos-related conditions. The Libby Medical Program, which currently has over 1,100 enrollees, funds monitoring and treating asbestos-related conditions and illnesses, hospice care and more. More information about this program can be found at www.libbymedicalprogram.com.

“We know that St. Johns provides excellent care for their patients and it is important that we continue to support them in their expanding technology and treatments, while supporting the Libby community as a whole,” remarked William Corcoran, Grace’s Vice President of Public and Regulatory Affairs.

GRACE

About Grace

Grace is a leading global supplier of catalysts and other products to petroleum refiners; catalysts for the manufacture of plastics; silica-based engineered and specialty materials for a wide range of industrial applications; sealants and coatings for food and beverage packaging, specialty chemicals and additives and building materials for commercial and residential construction.
