REACH - Status after End of Pre-Registration.doc

GRACE

REACH – Regulation 1907/2006/EC GRACE Davison Standard Reply for the Communication Process in the Supply Chain Status after December 1, 2008 – End of Pre-Registration

Dear Customer,

Thank you for your enquiry regarding our status on REACH. In order to provide you with a timely response, we have prepared this standard letter. We have an extensive customer base and many hundreds of products. Consequently, an individual reply to each request is not practicable and we ask for your understanding.

At GRACE Davison, as a global specialty chemical supplier, it is one of our utmost priorities to comply with all relevant legislation, which includes being well prepared for REACH. Therefore we have taken all necessary steps to have full compliance for our products with the new regulation and pre-registrations in place for all substances, which form our products since December 1, 2008, unless substances are clearly exempted from REACH. Depending on our product types – substances and formulations – we had to take different approaches. But whatever product you purchase from GRACE, you can be assured that maximum care was taken to consider all necessary steps ensuring continuous and smooth supply of our products.

The status of substances forming our products can be checked on our interactive web page:

www.grace.com/REACH/

Please follow the given guidelines on the front page so that you will receive an access code for the individual search portal of GRACE Davison pre-registration / reference numbers. The search function is based on the **CAS no.**, which is provided in chapter 3 of the product MSDSs. The web page will be continuously amended and in a later stage also the registration numbers added.

GRACE Davison has excluded the pre-registration of those substances, which are clearly included in Annex IV and V of the REACH regulation (e.g. natural substances or polymers), or meet the definition 'surface treated substances'.

2009 through 2010 and also 2013 will be key strategic years for all companies that are producing or importing chemicals. GRACE Davison is aware of these challenges and will take all necessary efforts to comply with the given requirements, starting to prepare the necessary registration dossiers either in consortia or individually. Also solutions for non-EU based customers will be available to ensure the unlimited use of our products.

Please do not hesitate to contact us in case of further questions about REACH, or contact your supply chain representative for supplementary information on our products.

Best regards,
GRACE GmbH & Co. KG

Dr. Jürgen Nolde
Director EHS, Davison Europe
